Dated: May 6, 2019

CONTRAVIR PHARMACEUTICALS, INC.

By: /s/ Robert Foster  
Robert Foster  
Chief Executive Officer

**ContraVir Pharmaceuticals Receives Positive Nasdaq Listing Decision**

EDISON, NJ — May 6, 2019 — ContraVir Pharmaceuticals, Inc. (Nasdaq: CTRV), a biopharmaceutical company focused on the development of therapeutic drugs for the treatment of liver disease arising from non-alcoholic steatohepatitis (NASH) and chronic viral infection, announced today that the Nasdaq Hearings Panel has granted the Company's request for continued listing on The Nasdaq Capital Market, subject to compliance with certain conditions.

The Company is diligently working to evidence full compliance with all applicable requirements for continued listing on The Nasdaq Capital Market, in particular the \$1.00 minimum bid price requirement.

**About ContraVir Pharmaceuticals**

ContraVir is a clinical stage biopharmaceutical company focused on the development of targeted therapies for liver disease arising from non-alcoholic steatohepatitis (NASH) and chronic hepatitis virus infection (HBV, HCV, HDV). The company's lead drug candidate, CRV431, reduces liver fibrosis and hepatocellular carcinoma tumor burden in experimental models of NASH. Preclinical studies also have demonstrated antiviral activities towards HBV, HCV, and HDV through several mechanisms. These diverse therapeutic activities result from CRV431's potent inhibition of cyclophilin enzymes, which are involved in many disease processes. Currently in clinical phase development, CRV431 shows potential to play an important role in the overall treatment of liver disease - from triggering events through to end-stage disease. **Forward Looking Statements**

Certain statements in this press release are forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995. These statements may be identified by the use of forward-looking words such as "anticipate," "believe," "forecast," "estimated," and "intend," among others. These forward-looking statements are based on ContraVir's current expectations and actual results could differ materially. There are a number of factors that could cause actual events to differ materially from those indicated by such forward-looking statements. These factors include, but are not limited to, substantial competition; our ability to continue as a going concern; our need for additional financing; uncertainties of patent protection and litigation; uncertainties with respect to lengthy and expensive clinical trials, that results of earlier studies and trials may not be predictive of future trial results; uncertainties of government or third party payer reimbursement; limited sales and marketing efforts and dependence upon third parties; and risks related to failure to obtain FDA clearances or approvals and noncompliance with FDA regulations. As with any drug candidates under development, there are significant risks in the development, regulatory approval, and commercialization of new products. There are no guarantees that future clinical trials discussed in this press release will be completed or successful, or that any product will receive regulatory approval for any indication or prove to be commercially successful. ContraVir does not undertake an obligation to update or revise any forward-looking statement. Investors should read the risk factors set forth in ContraVir's Form 10-K for the year ended December 30, 2018 and other periodic reports filed with the Securities and Exchange Commission.
